TAILORED DESIGN

XTONE has the ability to adapt to any size, use and space, making it an ideal material for all types of projects. There is no limitation for large format porcelain tile; a concept of use that goes beyond the traditional format and allows the execution of avant-garde ideas.

XTONE tiene la capacidad de adaptarse a cualquier medida, uso y espacio, por lo que se convierte en un material idóneo para todo tipo de proyectos. La limitación no existe para el porcelánico de gran formato; un concepto de uso que va más allá del formato tradicional y permite ejecutar ideas vanguardistas.

XTONE a la capacité de s'adapter à n'importe quelle taille, utilisation et espace, ce qui en fait un matériau idéal pour tous types de projets. Il n'y a pas de limite pour le grès cérame de grand format ; un concept d'utilisation qui va au-delà du format traditionnel et permet l'exécution d'idées avant-gardistes.

INNOVATIVE DECORATION TECHNIQUES

ECLIPSE®

PERSPECTIVE RELIEF 3D

Perspective relief effect. The relief is observed depending on how the light falls upon the surface and the viewing angle.

Efecto relieve en perspectiva. Se observa el relieve según la incisión de la luz sobre la superficie y el ángulo de visión.

Effet de relief en perspective. Le relief s'observe en fonction de l'incision de la lumière sur la surface et d'angle de vision.

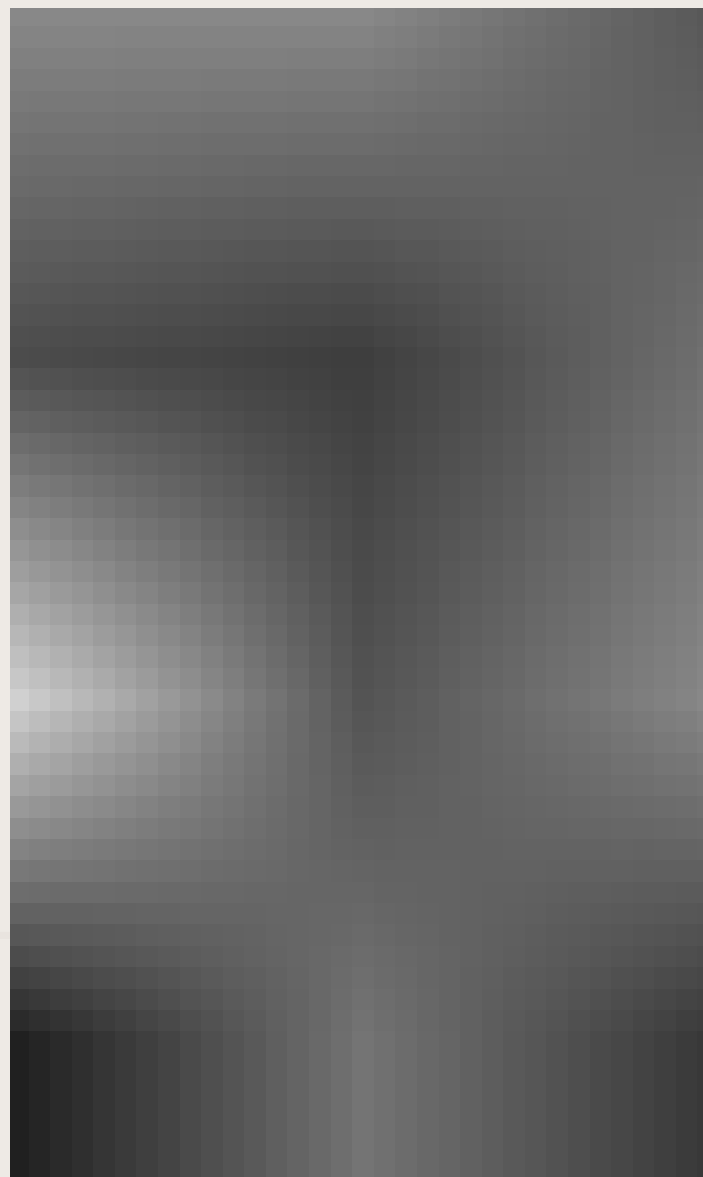

COMET®

GEMS DECORATION

Glowing effect. Bright particles that are applied to the grits and vary in intensity depending on the angle at which the surface is observed.

Efecto resplandeciente. Se aplican partículas brillantes en la granillera que varían de intensidad según el ángulo en el que se observa la superficie.

Effet de brilliance. Des particules brillantes sont appliquées sur les granules dont l'intensité varie selon l'angle d'observation de la surface.

LUMEN®

LIGHT SHINE EFFECT

Glitter effect. Precision decoration in selected areas of the design.

Efecto de brillo. Decoración de precisión en zonas seleccionadas del diseño.

Effet pailleté. Décoration de précision dans des zones sélectionnées du graphisme.

CLEANING POST- INSTALLATION

After the ceramic sheets have been laid, they must be protected to prevent them from getting damaged until all onsite work has been completed.

Before proceeding to give the tiled surface a final clean, wait for a prudent length of time (approximately 24 to 48 hours) so that the grouting material can set properly. In the case of polished porcelain sheets, once they have been grouted, they should be cleaned with a damp sponge before the grout can harden.

In general, a neutral or alkaline detergent like Acid Net should be used to clean away cement or grout residues. If epoxy-based grouts are used, clean away any remains as soon as the joints have been grouted, using a sponge and plenty of clean water. Then clean the surface thoroughly with an alkaline detergent, following the instructions on the product label. To care for the tiled surface, use a neutral detergent. To clean and care for the tile joints, use products specifically designed for this purpose.

Tras la instalación del material cerámico es imprescindible la protección del mismo para impedir posibles daños hasta la finalización de la obra.

Antes de realizar la limpieza final de obra es necesario respetar un tiempo de espera prudencial de 24-48 horas aprox., con el fin de que tenga lugar el correcto fraguado del material de rejuntado. En materiales porcelánicos pulidos, una vez rejuntado el material debe limpiarse con una esponja húmeda antes que el material de rejuntado se haya endurecido.

Como norma general se recomiendan productos ácidos tipo Acid Net teniendo en cuenta que no entren en contacto con los metales, siempre diluidos, para la limpieza de restos de cemento, juntas cementosas... En el caso de utilizar para el rejuntado productos epóxicos, eliminar los residuos inmediatamente después de las operaciones de colocación, utilizando una esponja y abundante agua limpia. Realizar a continuación una limpieza a fondo con la ayuda de detergentes alcalinos. En el mantenimiento del revestimiento utilizar detergentes neutros, y en la limpieza y mantenimiento de las juntas, utilizar productos especiales a tal fin.

Après l'installation du matériau céramique, il est indispensable de protéger le matériau pour empêcher d'éventuels dommages jusqu'à l'achèvement des travaux.

Avant de réaliser le nettoyage final du chantier, il est nécessaire de respecter un temps d'attente d'environ 24-48 heures, pour permettre la bonne prise du matériau de jointoiment. Pour les matériaux porcelainés polis, une fois le jointoiment réalisé on devra nettoyer le matériau à l'aide d'une éponge humide avant que le matériau de jointoiment ne durcisse.

En règle générale, nous recommandons des détergents neutres ou basiques comme par exemple Basic Gel pour le nettoyage des restes de ciment, mortier de jointoiment... En cas d'utilisation pour le jointoiment de produits époxy, éliminer les résidus immédiatement après les opérations de pose, en utilisant une éponge et de l'eau claire en abondance. Réaliser ensuite un nettoyage à fond à l'aide de détergents alcalins, en veillant à suivre les indications indiquées sur les étiquettes des produits utilisés. Pour l'entretien du carrelage céramique, il est conseillé d'utiliser des détergents neutres, et pour l'entretien des joints, utiliser des produits spécifiques à cette fin.

SUSTAINABLE DEVELOPMENT

XTONE is a firm committed to the environment and sustainable development through eco-sustainable production processes and the manufacture of more innovative products with the aim of minimizing environmental impact.

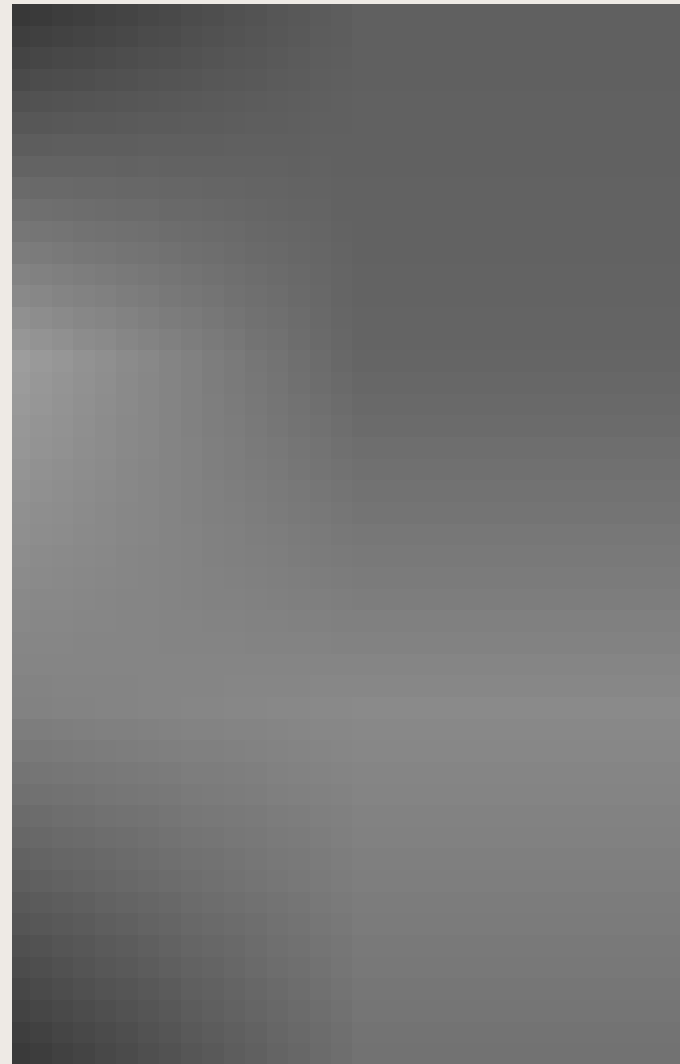

The XTONE production plant, inaugurated in 2023, promotes energy self-consumption and 100% recovery of resources. With a total of 4,475 solar panels, some of the sustainable measures carried out in these facilities are the recovery of 100% of the heat from the oven for drying processes, the reuse of 100% of the water through a treatment plant for industrial use and the recycling 100% of waste for reintroduction into the production system: REGAIN – full recovery system.

That is why behind each XTONE product, there is an environmental commitment through the creation of sustainable projects that contribute to a better future.

XTONE es una firma comprometida con el medio ambiente a través de procesos de producción ecosostenibles y la fabricación de productos más innovadores con el objetivo de minimizar el impacto ambiental.

La planta de producción de XTONE, inaugurada en 2023, impulsa el autoconsumo energético y la recuperación de recursos. Con un total de 4475 placas solares, en estas instalaciones se realiza la recuperación del 100% del calor del horno para los procesos de secado, la reutilización el 100% del agua mediante depuradora para su uso industrial y el reciclaje del 100% de las mermas: un sistema de recuperación completa de recursos – REGAIN.

Suponiendo un ahorro considerable en materias primas, detrás de cada producto XTONE, hay un compromiso medioambiental a través de la creación de proyectos sostenibles que contribuyen a un mejor futuro.

XTONE est une entreprise engagée envers l'environnement à travers l'utilisation de processus de production écologiques et la fabrication de produits plus innovants avec l'objectif de réduire l'impact environnemental.

L'usine de production de XTONE, qui a été créée en 2023, favorise l'autoconsommation énergétique et la récupération des ressources. Avec un total de 4475 panneaux solaires, ces installations permettent la récupération de 100 % de la chaleur du four pour la rediriger jusqu'au processus de séchage, la réutilisation de 100 % de l'eau via une station d'épuration à usage industriel et le recyclage de 100 % des déchets : un système complet de récupération des ressources - REGAIN.

En supposant des économies très importantes de matières premières, derrière chaque produit XTONE, il y a un engagement environnemental à travers la création de projets durables qui contribuent à un avenir meilleur.
